RAJESH KANNA V

SENIOR DATA SCIENTIST | APPLIED AI ENGINEER | TEAM LEAD

+44 7824682014 | vrajeshtrichy@gmail.com | Chennai, IN
LinkedIn | GitHub | Portfolio

SUMMARY

Senior Full-Stack Data Scientist with 7+ years of experience delivering production-grade AI solutions. Proven track record in leading cross-functional teams to bridge the gap between traditional statistical modeling and Generative AI. Expert in GCP and AWS environments, specializing in the end-to-end ML lifecycle—from classical regression/ classification for revenue forecasting to Agentic RAG architectures for enterprise decision intelligence.

TECHNICAL SKILLS

Generative AI & LLMs: Agentic AI (LangGraph), RAG, LLMOps, Prompt Engineering, Semantic Search (FAISS).

Traditional ML & Stats: Regression (Linear/Logistic), Classification (Random Forest, XGBoost), Statistical Modeling, RFM Analysis, Cohort Analysis, Time-Series Forecasting (Prophet).

Data Engineering & SQL: Advanced SQL (BigQuery, PostgreSQL, Redshift), PySpark, ETL Pipelines, Feature Engineering.

Cloud & DevOps: GCP (Vertex AI, Cloud Run, Cloud Build), AWS (SageMaker, Lambda, EMR, Glue), Docker, Kubernetes, CI/CD.

Full-Stack & Tools: Python (FastAPI, Flask), JavaScript (React), Git, MLflow, Airflow.

PROFESSIONAL EXPERIENCE

ALTIMETRIK | Senior Data Scientist (Client: Ford Motors GDIA)

Chennai, IN *02/2025 – Present*

Team Leadership: Lead a team of 3 Data Science Engineers, overseeing project delivery, code reviews, and the integration of ML models into Ford's global data infrastructure.

- **Vehicle Sales Revenue Prediction:**
  - Architected a two-stage **Point-in-Time (PiT) model** to optimize fleet revenue forecasting.
  - Developed a **Classification model** to predict customer purchase propensity - improving lead conversion accuracy by 14% and a **Regression model** to forecast specific vehicle counts - reducing volume forecast error/RMSE by 18%.
- **Parts Sales & Customer Segmentation:**
  - Built an **RFM (Recency, Frequency, Monetary)** framework to segment parts customers; identified high-churn risk segments representing 22% of annual revenue.
  - Leveraged **cohort analysis** to predict long-term revenue trends, enabling targeted marketing strategies that improved customer retention by 10%.
- **Agentic AI & Decision Intelligence:**
  - Productionized an **Agentic RAG + GenAI decision layer** on GCP for Ford cost analytics, reducing average time-to-decision by ~40% and achieving ~20% cost savings on procurement recommendations.
  - Architected end-to-end **MLOps & CI/CD pipelines** using FastAPI and Docker to standardize releases and accelerate model rollouts.

AMAZON | Data Analyst (Logistics)

Birmingham, UK *10/2023 – 01/2025*

- Analyzed real-time operational datasets using Python and SQL to identify bottlenecks in automated warehouses handling 45,000+ daily shipments.
- Enhanced task routing and shipment forecasting through statistical modeling, reducing manual interventions by 15%.
- Collaborated with central data science teams on internal tooling and performance dashboards integrated with Redshift.

TATA CONSULTANCY SERVICES | Data Scientist (Industry Advisory Group)

Chennai, IN *06/2017 – 10/2021*

- **NLP System for Last-Mile Enhancement (AWS):** Built a BERT-based NLP model (F1: 0.91) for 500K+ feedback entries, improving delivery satisfaction by 15% and cutting operational costs by 10%.
- **Event Log & Parcel Optimization:** Processed 40M+ records via PySpark/EMR, reducing processing time by 40%. Utilized **Prophet-based forecasting** (MAPE: 8.5%) to improve delivery accuracy by 18%.
- **ML-Driven Personalization:** Integrated recommendation features for travel and hospitality clients though social media activities, increasing user engagement by 20% through tailored travel suggestions.

HONOURS & AWARDS

Gem Award (Altimetrik) – GenAI Excellence: Awarded for rapidly delivering an end-to-end GenAI application for Ford from research through production launch.

Gem Award (Altimetrik) – Strategic Impact: Recognized for exceptional contributions to organizational growth, including leading L1/L2 technical recruiting discussions, mentoring engineers in AI/DS, and conducting org-wide knowledge sessions with 100% attendance.

Raising the bar (Amazon): Recognized for driving team to success, consistently achieving quarterly KPI targets

Star Performer (TCS): Awarded for role-modeling and leading a group of 50+ associates in monitoring and tasks execution.

EDUCATION

MSc in Artificial Intelligence & Machine Learning | University of Birmingham, UK *09/2021 – 09/2022*

Applied Data Science: Leveraging AI | MIT Professional Education *02/2024 – 06/2024*

Natural Language Processing Specialization | DeepLearning.AI *04/2023 – 07/2023*

MEMBERSHIPS

Data Science Fellow | Royal Statistical Society (RSS), United Kingdom.

Science and Technology Member | Computer Science Society (CSS), University of Birmingham.
